

Accessanka is designed as an accessory to Weightanka to provide a portable anchor device for qualified rope access technicians, allowing them to work safely in accordance with BS 7985, the "Code of Practice for the Use of Rope Access Methods for Industrial Purposes". When correctly installed, the system is extremely stable and will not migrate across the roof surface either in normal use or when arresting the fall of both a worker and a rescuer up to a 200kg limit. Accessanka has been designed for easy transportation and installation with no part over 25kg or 2 metres.

Kee Safety Accessanka portable deadweight anchor system for rope access. Conforms to EN795 Class B, CE Certified N.B. the Accessanka is an accessory to and must be used in conjunction with a Kee Safety Weightanka portable deadweight anchor.
