

A KEE SAFETY PRODUCT

SAFE RAPID ACCESS

Industrial Roof Safety Solutions

- RANGE OF PRODUCTS SUITABLE FOR FRAGILE ROOFS
- PROVIDE SAFE WORKING POSITION FOR MAINTENANCE TASKS
- PORTABLE SOLUTIONS
- QUICK AND EASY TO ASSEMBLE AND USE

Board-Walk

BOARD-WALK is an open mesh walkway which allows access from eaves to the ridge while spreading the load on support battens to provide the user with a safer working position. Each system is designed to fit specific individual roof sizes and configurations and can be installed to run vertically up, or down, or horizontally across the roof. BOARD-WALK is compliant with EN 12811-1 and EN 795:2012.

HATCH BOARD-WALK allows users to bridge over a fragile valley and to access the valley. The system comprise 2m sections made from high grade aluminium staging which can be easily lifted to gain access to the valley for regular maintenance.

Valley-Walk

VALLEY-WALK is a fully adjustable, mobile walking frame for one or two persons, designed to provide mobile access along valley gutters.

Lightweight, easy to assemble and adjustable for most roof angles, VALLEY-WALK features cushioned outriggers and safety mesh which provide good visibility and safe weight distribution. The system is compliant with EN 12811.

Roof-Walk

ROOF-WALK is a fully guarded rolling platform mounted on twin tracks to allow movement up and down the roof. Provides users with a safe, working position for skin maintenance, inspection, cleaning or re-sealing work.

Available as standard 4.6m or specially made 2.5m platform, the system runs up and down twin modular 4m lining track sections which are fitted with safety mesh and support battens. ROOF-WALK is compliant with EN 12811.
